It is a well-known fact that French Roman Hyacinths have, during the early Spring, suffered severely from incessant rains, detrimental to the healthy development of the Bulbs, which on account of this diseased condition are scarce, and too high in price, leaving no profit to the florist to force them for cut-flower trade.

The Dutch miniature Hyacinths. Sound and healthy Bulbs, and which, if planted immediately on arrival from Holland, may be had in bloom latter part of January or early February. I offer at about **ONE HALF THE PRICE** of the French Bulbs. Please take note of the Price and Size.

The increased demand for these Miniature Hyacinths caused by scarcity of the French Bulbs, is likely to affect the market price "as the supply will not be large enough to meet the demand."

EARLY ORDERS ARE THEREFORE ADVISABLE.
